

Cambridge Isanti Public Schools

Building Security

Security of the district's facilities along with the safety of students, adults and staff are a focus of the school district. Measures are taken to provide a safe and secure environment for our students to learn.

The district has invested in technology and programs to assist with safeguarding our students as well as district owned property including:

- **Anti-bullying Programs**—reinforce acceptable behaviors and provide training to students with resources and information to help report bullying and foster respect for others.
- **Office Visitor Management System** (see video on District Web page.
- **Upgraded locks/hardware** with secure keys that are not able to be duplicated at the local hardware store—better internal key control.
- **Card access system** has been added to key points of entry at nearly every facility. Staff can use their card access card to gain entry into the building during their workday while keeping all of the doors locked and secure except for the main points of entry.
- **CCTV camera systems** that assist school resource officers by recording events that can be recovered via a digital recorder.
- **School Resource Officers** –this is a cooperative program between the cities of Cambridge and Isanti. Both public entities help fund a police officer to assist with high school and middle school student supervision and discipline.
- **Security alarms**—assist with monitoring schools 24-7 to protect the facilities from unlawful entry.

Providing a safe and secure environment for students while receiving an education is of utmost importance to District 911.
